Contract Task Order (CTO) No. 155

Subject: Transmittal of Final Underground Storage Tanks (USTs) Remedial Investigation Work Plan
Various Sites (Group II), Naval Weapons Station (NWS) Earle, New Jersey

Dear Mr. Helland:

Please find attached four copies of the subject work plan, including appendices. In accordance with the statement of work, dated February 8, 1994, four copies of the subject work plan, including appendices, have been transmitted under separate cover to the Commanding Officer, NWS Earle.

The revisions requested by Mr. Bob Marcolina, New Jersey Department of Environmental Protection (NJDEP) Bureau of Federal Case Management (BFCM) case manager for CTO 155, in a letter dated November 22, 1994, have been addressed in the work plan. The additional information, that was attached to your memorandum, dated December 15, 1994, has been incorporated into the report and, based upon this information, the proposed investigative strategies for USTs C8/2, R4B/1, and R5/1 have been revised. Because the work plan was revised after having been reviewed by the NJDEP BFCM case manager, Halliburton NUS Corporation recommends that the case manager be contacted and offered the opportunity to review the revised sections of the work plan.

Please contact me at the above number if you have any questions or comments.

Respectfully,

A handwritten signature in dark ink, appearing to read "Jill Hartnell", is written over a horizontal line.

Jill Hartnell, CPG
Project Manager
